Published Aug 7 · refreshed Aug 14, 2026: 14 cars in play, 7 sold, 6 written quotes in hand · every row shows price, miles, days listed and dealer replies as of the Aug 14 sweep · listings change daily; verify before contacting

278 raw listings → 153 unique VINs → 112 pass filter (Aug 7); Aug 12 sweep 386 raw → 223 VINs

TL;DR

- Update Aug 14:** fresh read-only datacenter sweep. 7 tracked cars have sold and are removed from the tables below: #1 (Puyallup '23 2.5 Turbo), #2 (Acura of Seattle 2022 Turbo), #3 (BMW Seattle GT Reserve), #8 (Royal Moore '23 Preferred), #11 (CarMax Sacramento), #16 (Doug's Lynnwood GT), #18 (Auto Connections Bellevue). Every other numbered car re-verified with no listed-price change except #12 (not reachable from the sweep environment). Written quotes are in hand from Hyundai of Kirkland (#5, accident on the Carfax); Puyallup Mazda (#6); Puyallup Mazda (#9); Titus-Will (#13); Rodland Toyota (#14); Auto 206 (#17, accident on the Carfax); the figures stay off this public page. No-haggle anchor: 2023 2.5 S Premium at CarMax Renton, \$27,998, no transfer fee. Live availability on the [status board](#).
- Best remaining, comfort-first: #5 2021 Grand Touring at Kirkland (\$25,192 list, written itemized quote in hand) leads on equipment, with two caveats now on the record: the dealer-run Carfax reports an accident on 07/31/2021, and the GT Premium package is sourced from a listing field and has not been confirmed against the window sticker. Then #12 Mazda-CPO 2023 Preferred at Lee Johnson (\$26,348) and #13 ventilated-seat 2022 Premium Plus in Olympia (\$27,389 list, revised written quote in hand), then the CPO pair: #9 2023 Carbon at Puyallup (\$27,699) and #7 2022 Carbon at Lee Johnson (\$27,512). #4, the dealer-confirmed Carbon Turbo in Portland at \$26,102, is the Oregon fallback (email only). See New candidates below.
- Cheapest solid vs. stretch: #4 2021 Carbon Edition Turbo at \$29,559 out-the-door (est, \$576/mo) vs. #14 2023 2.5 S Premium at \$32,029 (quoted, \$624/mo): +\$2,470 and +\$48/mo buys 2 model years, 17k fewer miles.
- Trim value: #14 2023 2.5 S Premium sits \$537 over KBB Seattle fair purchase price (\$28,287 vs. \$27,750) and #4 2021 Carbon Edition Turbo sits \$2,612 under KBB Seattle fair purchase price (\$26,762 vs. \$29,374). The \$24,999 GT Reserve that matched them sold Aug 11. The 2021 Signature generally trades over book (#21 is \$789 over its KBB figure but \$1,999 under the CarMax benchmark).
- Financing math: every \$1,000 financed ≈ \$19.47/mo at 6.30% APR over 60 months. No Mazda CPO promo rate applies to the CX-5 right now (3.9% is CX-90/CX-70 only).

What changed

Refresh log; newest first. Generated build 2026-08-14.

- Aug 15, 2026:** Search closed. The buyer purchased the 2023 CX-5 2.5 Turbo AWD (VIN JM3KFBAY3P0289626, 27,990 miles) from Puyallup Mazda on Aug 15 2026. The board is frozen as of that date. Prices, availability and history notes on the remaining cars reflect the last verification before close and are no longer being maintained. Verified in person that day: the 2023 Turbo's original window sticker (full comfort package standard on the 25T trim) and a clean one-owner CARFAX. Removed from consideration: Puyallup's red 2021, a Canadian-market car whose CARFAX records a Saskatchewan safety-inspection failure on 8/15/2025 with no repair record after it.
- Aug 14, 2026:** Puyallup Mazda: itemized worksheet received for the certified 2023 Carbon (#9); zero add-ons. Titus-Will: dealer confirmed their best number and stood down; the Olympia car is off the weekend visit list.
- Aug 13, 2026:** Royal Moore: one 2023 Preferred sold per the dealer; the remaining one was requested with the dealer-added items removed. Puyallup Mazda: pricing breakdown received for the CPO 2023 Carbon (#9); worksheet attached in email. Royal Moore: manager follow-up received Thu afternoon; reply prepared. Hyundai of Kirkland: updated written proposal received midday; license-at-actuals refund and two keys confirmed in writing; window sticker check in progress.
- Aug 12, 2026:** Puyallup Mazda (#1, #6): written itemized quotes surfaced (sheets dated Aug 11 had landed in spam); zero add-ons on both. #9's breakdown requested.

- **Aug 12, 2026:** Lee Johnson (#7, #12): both inquiry emails bounced back undelivered (dealer mail server unreachable); a new contact path is being arranged.
- **Aug 12, 2026:** Fresh read-only sweep (AutoTempest, CarGurus, KBB, CarMax, Carvana, Craigslist: 386 raw / 223 VINs). Every live board car re-verified with no listed-price change; #12 (Cars.com-only) could not be re-checked from the sweep environment. 26 VINs not seen before: 25 disqualified (unwanted trim, out-of-area no-haggle units no better than #15, no value signal), 1 added as #21 (2021 Signature, Burlington WA, \$25,999 + \$200). Rodland (#14) pricing sheet transcribed: clean sheet, no add-ons; tax and licence lumped in one line, itemization requested. Site now regenerates every section and download from one board file, so the cost table, compare box, calculator and top picks follow the live set (sold #3 dropped from the picks; quoted OTDs replace estimates where dealers have replied). 2024 model-year sweep — no verified-clean, non-rental 2024 Preferred/Carbon/Premium under 40k mi lands at or below the finalists' \$28.7–32k est. OTD; three 2024s added to the watchlist (watch only, not numbered board cars).
- **Aug 11, 2026:** Buyer outreach began: itemized-OTD requests to every live dealer; written numbers back from Kirkland (#5), Titus-Will (#13, revised), Auto 206 (#17), Rodland (#14) and Royal Moore (#8, add-ons to strike). Sold and removed: #2 Acura of Seattle Turbo, #3 BMW Seattle GT Reserve (dealer-confirmed), #11 CarMax Sacramento, #16 Doug's Lynnwood GT, #18 Auto Connections Bellevue. #1's reported sale was wrong (live on CarGurus and Puyallup Mazda's own site at \$27,999). Comfort-first re-rank and WA-first re-scan added #12–#20; tax model corrected to dealer-city rates (Seattle 11.05%) from the flat 10.35% used on Aug 7.
- **Aug 7, 2026:** Initial read-only market scan: 278 raw listings → 153 unique VINs → 112 pass the disqualifiers; 11-car shortlist ranked by value.

Top 3 right now (Aug 14)

Picks are drawn from live cars only, as of the Aug 14 refresh; ranks refer to the full board (#1–#21), so gaps are expected. #1, a pick at publication, sold Aug 15 (purchased by the buyer this report was built for). #3, a pick at publication, sold Aug 11 (dealer confirmed Aug 11 PM; CarGurus copy closed Aug 12). Monthly figures use the dealer-city estimate for every car; a "quoted" chip marks cars whose written sheet is in hand, with the figures kept off this page. See the [status board](#) for what remains.

Shortlist: 6 active cars, ranked by value

Click a column header to sort. Row data is as of the Aug 14 sweep: today's listed price (or a lower written quote, marked "quoted"), latest odometer, days listed, today's CarGurus / KBB value figure, and the latest word from each dealer. Sold cars are removed (list below the table); rank numbers stay stable, so gaps are expected. The [PDF](#), [Excel](#) and [Word](#) copies carry the same Aug 14 data.

Filtered from 163 merged records → 112 passed disqualifiers (0 accidents, non-fleet, no lemon/frame, ≥6 photos where known, VIN present or CL/SeeCars-flagged, wanted trim). Ranked on deal-rating / KBB-FPP-delta → \$-below-market → 1-owner → CPO → mi/\$. At least 3 non-CarGurus sources enforced. All VINs = 0 open NHTSA recalls (2021/22/23 CX-5, checked 8/7/26). The #1–#21 numbers are stable identifiers from that August 7 screen, used throughout this report, and they reflect listing data only. They are not a current preference order: dealer out-the-door quotes have since reshuffled the field, so read the cost table for live standings.

Value: \$2,000 under the CarMax Renton benchmark and \$713 under #19 with 4.9k fewer miles, though KBB rates it \$789 over its own \$25,410 FPP. Independent lot 61 mi north: full history report + inspection before any money talk. Latest: not contacted (found Aug 12).

#16 (Doug's Lynnwood Mazda 2021 Grand Touring AWD, \$28,700) and #18 (Auto Connections of Bellevue 2023 2.5 S Preferred, \$26,495) sold and are removed. Aug 12 sweep: 223 VINs across AutoTempest, CarGurus, KBB, CarMax, Carvana and Craigslist; 26 not seen before, 25 disqualified (unwanted trim, out-of-area no-haggle units no better than #15, no value signal), 1 added as #21. No listed-price change on any live board car (source by source); no watchlist move; #12 could not be re-verified (Cars.com-only listing, bot-blocked from the sweep environment). No further car met the two-source sold test.

Watchlist: 13 cars screened, not on the board

Not numbered board cars and not in the top picks, cost table or chart. Re-priced on each sweep (price column as of Aug 14); a car moves onto the board only if it clears the same filters and beats a live finalist on out-the-door cost. 2024 model year: watch only sits in its own group below.

Screened and parked (10)

MY2021–2023 cars that passed the filters but lose to a numbered board car on miles, trim, history or location; re-priced on every sweep in case one moves.

2024 model year: watch only (checked Aug 12) (3)

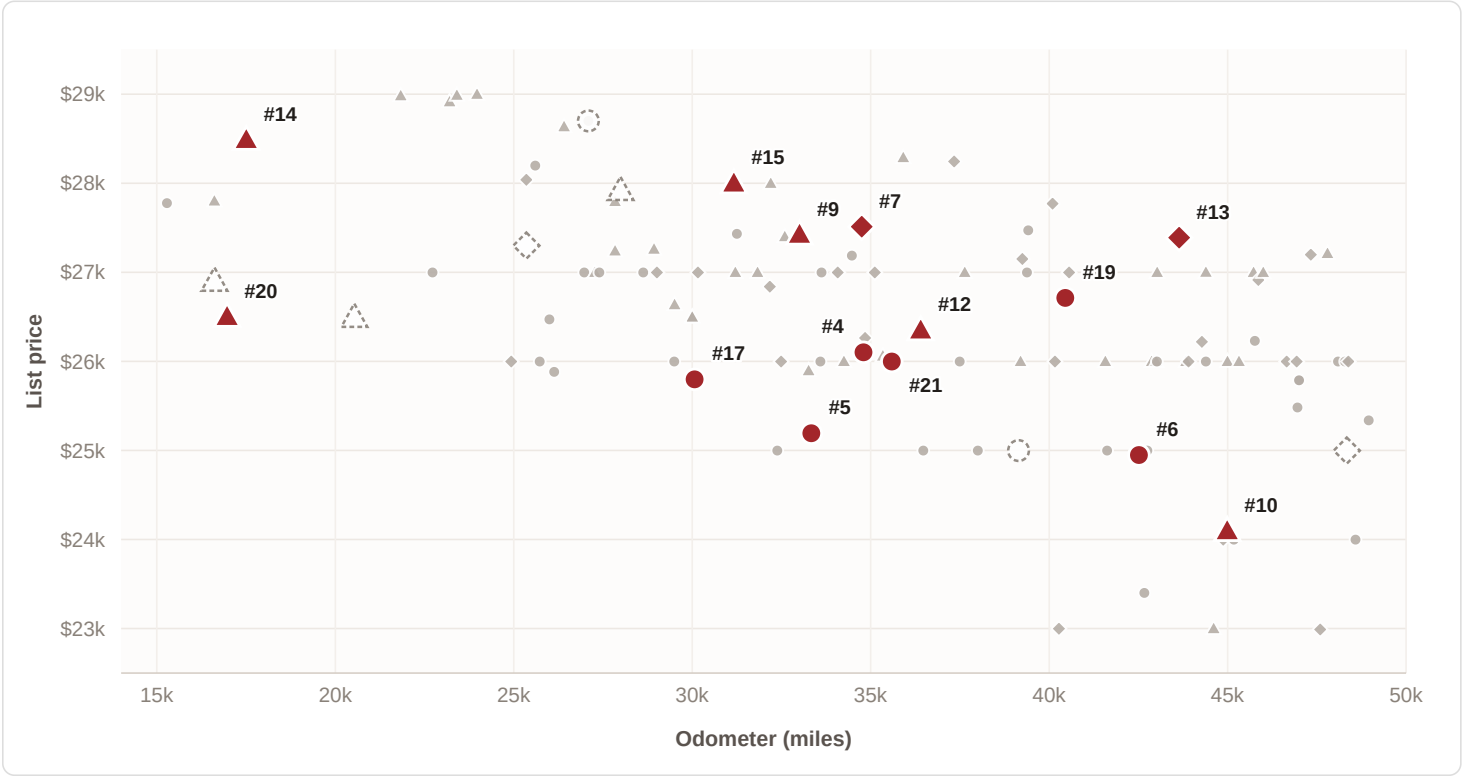

A separate Aug 12 read-only sweep of used 2024 CX-5s (263 VINs; 40 at WA/OR dealers) found no verified-clean, non-rental Preferred / Carbon / Premium under 40k mi that lands at or below the finalists' est. out-the-door range, so 2024s stay off the numbered board. These three are the ones worth watching; est. OTD = price × (1 + dealer-city rate) + \$200 doc + \$600 licence, monthly at 6.30% / 60 mo. About 11% of 2024s with a disclosed history are ex-rental or fleet, concentrated in Select / Carbon Edition under \$26.5k, so any cheap 2024 needs the Carfax owner-type line first.

Price vs. miles: where the picks sit in the market

● 2021 ◆ 2022 ▲ 2023 | ● passing listing (112) ● live board car, labeled by rank
○ sold (#1, #2, #3, #8, #11, #16, #18), hollow at last asking price

All 112 listings that passed the Aug 7 filters (from the merged, de-duplicated set), re-priced wherever the Aug 14 sweep saw the same VIN (72 of 112), plus every board car at today's price. Read it vertically: at any given mileage, a dot *below the cloud* is priced under comparable cars; that is where the numbered live cars should sit, and mostly do. Sold cars are drawn hollow and unlabeled at their last asking price. Hover or tap a dot for details.

KBB Fair Purchase Price vs. the lowest clean listing still live

KBB national = kbb.com pricing pages (default zip, "typical" mileage). KBB Seattle = per-listing FPP averaged from KBB search results (mileage-adjusted, local). Δ = lowest clean listing – Seattle FPP (or national when Seattle n/a). Lowest clean listing = cheapest Aug 7-passing listing the Aug 14 sweep still saw (by VIN, at today's price) or a live board car with a verified 0-accident history; "—" where nothing in that cell is live.

Where the market is soft right now

- **2021 Grand Touring is the standout buy:** \$24,998 (CarMax) vs Seattle FPP \$27,552, \$2,554 under book.
- **Also well under book:** 2023 2.5 Turbo \$28,998 vs \$30,980 (−\$1,982); 2023 2.5 S Premium \$25,998 vs \$27,825 (−\$1,827); 2021 Touring \$23,998 vs \$25,809 (−\$1,811).
- **Premium Plus vs. Premium (2023):** lowest Premium is \$25,998, lowest Premium Plus \$28,915; the \$2,917 gap buys the 360° camera, ventilated seats, wireless CarPlay and heated rear seats, about \$57/mo.
- **Trading over book:** 2021 Signature (turbo) (\$25,999 vs \$25,041, +\$958). Negotiate these to FPP or walk to the tier below.

What it costs per month

Live cars only, sorted by out-the-door. Where a dealer has replied in writing, the quoted OTD replaces the estimate.

TERM	60 months	APR	6.30%, Bankrate super-prime used-auto average, updated 7/31/26
CREDIT-UNION CHECK	BECU 5.99% effective 8/1/26	CPO PROMO	None on CX-5; Mazda's current 3.9% CPO rate is CX-90 / CX-70 only

SALES TAX	Dealer-city vehicle rate: Seattle 11.05% · Renton 11.00% · Kent 10.90% · Kirkland 10.80% · Puyallup 10.80% · Everett 10.40% · Olympia 10.20% · Burlington 9.10%; Oregon dealers → 11.05% WA use tax	FEES	+\$200 doc (WA; \$250 OR; \$0–\$100 where the dealer advertises none) · +\$600 est. license / title / RTA
OUT-THE-DOOR	Est. OTD = price × (1 + rate) + doc + \$600; a “quoted” chip marks cars with a written dealer sheet in hand, figures kept off this page	PAYMENT	$M = P \cdot r(1+r)^n / ((1+r)^n - 1)$, r = APR/12, n = 60

WA-dealer sales are taxed at the dealer's city rate (DOR Q3-2026 combined rate + 0.5% motor-vehicle tax: 9.1–11.2% around Puget Sound), so a Kirkland or Puyallup dealer runs ~0.25 pt under Seattle and Burlington nearly 2 pt under; Oregon-dealer purchases owe 11.05% WA use tax at registration. Tax is applied to the vehicle price; the doc fee and licence estimate are added untaxed, which is how the written dealer sheets received so far are built. Earlier versions of this page used a flat 10.35%, which understated OTD by roughly \$200–250.

Cheapest solid vs. stretch

	CAR	PRICE	OTD	@ \$0 DOWN	@ \$5K DOWN
Cheapest solid	#4 2021 Carbon Edition Turbo · 35k mi Ron Tonkin Honda, Portland, OR	\$25,852	\$29,559 est	\$576	\$478
Stretch	#14 2023 2.5 S Premium · 18k mi Rodland Toyota, Everett, WA	\$28,287	\$32,029 quoted	\$624	\$526
Δ	+2 model yrs, -turbo, -17k mi	+\$2,435	+\$2,470	+\$48/mo	+\$48/mo

Cheapest solid = lowest estimated out-the-door figure among live cars with a verified 1-owner / 0-accident history (or Mazda CPO) at a franchise dealer. Stretch = best-value live 2023 in the Turbo / Premium tiers, ranked by list price against KBB Seattle fair purchase price. Both are recomputed from the board on every refresh.

Payment calculator

Same math as the table: OTD = price × (1 + tax) + doc + licence (tax on the vehicle price; the doc fee and licence estimate are added untaxed, as on the dealer sheets received), or the written out-the-door figure if you enter one; standard amortization. Pre-filled with #4 at its Portland rate.

OUT-THE-DOOR (EST.)	AMOUNT FINANCED	MONTHLY PAYMENT	TOTAL INTEREST	PER \$1,000 FINANCED
\$29,559	\$29,559	\$576/mo	\$4,976	\$19.47/mo

Worked example, #4 2021 Carbon Edition Turbo (cheapest solid): \$25,852 price → \$29,559 out-the-door → \$576/mo at \$0 down, or \$478/mo with \$5,000 down (6.30% APR, 60 mo). Constants: \$250 doc fee and \$600 licence estimate.

No-haggle ceiling: CarMax / Carvana

Walk-away numbers: if a dealer won't beat these for the same tier, buy the fixed-price unit.

- 2023 Premium tier (WA): CarMax Renton \$27,998 (31,166 mi, no transfer fee, listed Aug 10, #15); the benchmark every negotiated OTD must beat.
- 2023 Preferred tier: Columbia Sales & Service (OR indie) \$24,095 (44,989 mi, \$23,995 + \$100 doc, #10) · Carvana \$24,590 (41k mi, Aug 7 reference).
- 2022 Carbon / Premium tier: CarMax: the \$24,998 Sacramento Carbon (#11) sold Aug 11 · Carvana \$28,590 (15k mi Premium, Aug 7 reference); nearest replacements: CarMax Huntsville 2022 Carbon \$27,998 (21,750 mi) + shipping; CarMax Henderson 2023 2.5 Turbo \$27,998 (23,947 mi) + shipping.

Email template: itemized OTD request

Hi, I'm Evan, looking at your [YEAR] Mazda CX-5 [TRIM], stock #[STOCK] / VIN [VIN]. I'm comparing several CX-5s in the Seattle area this week and narrowing to two or three. Could you email me an **itemized out-the-door quote in writing**: vehicle price, doc fee, sales tax, title/registration, and any dealer add-ons listed separately? I'm undecided on financing vs. outside lender, so please quote the cash OTD; we can talk financing after. Thanks. Happy to come see the car once I have the numbers.

Sources & method

13 sources across 2 rounds, plus daily re-check sweeps

SOURCE	STATUS	PULLED	WHAT IT ADDED
AutoTempest	ok	77	Aggregator seed — Cars.com / CarGurus / TrueCar / Carvana / CarSoup / AutoByTel VINs in one shot

SOURCE	STATUS	PULLED	WHAT IT ADDED
CarGurus	ok (VDPs only)	41	Richest per-car data: accidents, owners, CPO, photo count, days-on-lot, \$-below-market. Search page is DataDome-blocked; detail pages fetched via AutoTempest listing IDs
CarMax	ok	72	National no-haggle floor via /cars/api/search/run JSON API. Transfer fees per unit
Carvana	blocked (fallback ok)	10	Cloudflare Turnstile on carvana.com; 10 listings recovered via AutoTempest
KBB	ok	47	Round-2 win. Per-listing KBB Fair Purchase Price + delta, price-drop history, AutoCheck vhrPreview (accidents / 1-owner), CPO flag. Cox backend = Autotrader inventory
iSeeCars	ok	20	Price/miles only (no VIN on search page). 15/20 soft-matched to existing VINs — confirmed cross-listing, no net-new inventory
Craigslist	ok	11	All dealer reposts (Royal Moore, Mazda of Gladstone, Ron Tonkin). No private-party CX-5s in range. No VINs on search page
Autotrader	blocked	0	Akamai bot-block (headful too). Same Cox inventory as KBB — covered
Edmunds	blocked	0	403 edge/WAF, IP-based. Tried headless, headful, direct API
Cars.com (VDPs)	blocked	0	Cloudflare challenge on detail pages. Search-page data via AutoTempest is fine (18 listings)
TrueCar	blocked	0	PerimeterX captcha. 5 listings recovered via AutoTempest
CarFax	blocked	0	DataDome captcha (captcha-delivery.com)
FB Marketplace	blocked	0	Login wall — skipped per read-only rule

Honest read: the proxy IP is on Akamai / Cloudflare / DataDome / PerimeterX blocklists, so 6 of 13 direct sources are unreachable. But the blocks cost almost nothing: Autotrader = KBB inventory (got it), TrueCar / Cars.com = AutoTempest feed (got it), CarFax listings = mostly CarGurus overlap. Net-new inventory from round 2 is ~22 cars (KBB-only VINs); everything else was already in round 1 under a different badge.

Dedupe: 278 raw → 153 unique VINs (VIN-matched) + 10 no-VIN orphans. 21 no-VIN records soft-matched to existing VINs by (year, ±1k mi, ±\$250) and folded in as “also on” tags.

Re-check sweeps

- **Aug 12, 2026:** read-only datacenter sweep. Read-only datacenter sweep: AutoTempest results page, CarGurus VDP JSON for every CG id (board + feed), KBB SRP __NEXT_DATA__ (2 pages) + KBB VDPs for board/Autotrader ids, CarMax /cars/api/search/run, Craigslist SRP, one dealer VDP GET (#4). No forms, no availability clicks. Dealer comms logged in the repo take precedence over listing state.
- **Aug 12, 2026:** 2024 model-year sweep (read-only, watchlist only). AutoTempest results page (Cars.com, AutoByTel, CarGurus, TrueCar, CarSoup, Carvana cards), CarGurus VDP JSON for all 112 CG ids, KBB SRP __NEXT_DATA__ + KBB pricing page (8 trims), CarMax /cars/api/search/run (nationwide, shippable to 98101), Craigslist Seattle + Portland, NHTSA recalls/complaints. Page loads and JSON GETs only; no forms, contact clicks or accounts.
- **Aug 11, 2026:** live re-check in the buyer’s own browser + WA-first re-scan. Live page loads in Evan’s own Chrome (residential IP): CarGurus VDP rendered text, KBB VDP, Cars.com VDP/SRP, CarMax VDP, Autotrader SRP, dealer own-site VDP/inventory search. Read-only; no forms touched, no logins.

Filter & ranking rules

- Disqualify: any reported accident, fleet / rental prior use, lemon or frame-damage flag, fewer than 6 photos (where photo count is known), missing VIN (unless Craigslist / iSeeCars-flagged), missing price or miles.
- Trim: unwanted trims (Sport, Select, base 2.5 S) dropped unless priced more than \$3k under the year average.
- Rank: deal rating / KBB FPP delta → \$ below market → 1-owner → CPO → miles per dollar; at least 3 non-CarGurus sources and all 3 model years enforced on the shortlist.

NHTSA recalls: 0 open campaigns for MY2021–2023 CX-5 (checked 8/7/26). Verify by VIN at [nhtsa.gov/recalls](https://www.nhtsa.gov/recalls) before purchase.

Footnotes

- Merge: 278 raw records (R1 200 + R2 78) → 153 unique VINs by exact VIN match; 21 no-VIN records soft-matched by (year, $\pm 1k$ mi, $\pm \$250$); 10 no-VIN orphans retained (Craigslist / iSeeCars). Per-source primary contribution after dedupe: CarMax 68, CarGurus 41, KBB 22, Carvana 10, Cars.com 7, iSeeCars 5 orphan, Craigslist 5 orphan, TrueCar 2, CarSoup 2, AutoByTel 1.
- KBB national FPP is default-zip (75201) at “typical” mileage — reads $\sim \$3\text{--}5k$ below Seattle retail across the board. Use the Seattle-derived FPP column for delta math.
- #6 KBB record has null kbbFpp (delta shows as $-\$25,198$ in raw data — artifact, ignored).
- CarMax pick #11: priorUse=[] (no fleet flag); CarMax history report available on the vehicle page.
- iSeeCars adds no VINs and no history data — useful only as a cross-listing signal. Craigslist yielded zero private-party sellers in this range.
- Data captured Aug 7, 2026; board and candidates re-checked with fresh sweeps Aug 11, Aug 12, 2026; 2024 model year swept separately Aug 12 (watchlist only). This page, the status board, the map and the downloads are regenerated together from one board file on every refresh.

Research compiled Aug 7, 2026 as a read-only scan; buyer outreach to dealers began Aug 11 and listings were last re-checked Aug 14, 2026 (see the [status board](#)). Not affiliated with any seller. Verify history reports and pricing independently before purchase.
